

Master of the Seven Seas — Faction Sigils & Emblems

Master of the Seven Seas — Faction Sigils & Emblems

Official emblem design sheet and reproduction guide

Production Standard

The large supplied emblems are the master visual references. They are intentionally ornate, painterly and dimensional. Actual game applications should use controlled 2D adaptations derived from these exact marks.

Crown Imperium

- Core symbols: crown + anchor + compass/star + laurel + maritime waves.
- Primary palette: Imperial green, antique gold, warm ivory.
- Sails/flags: simplified 2D emblem with strong negative space and no tiny sculptural detail.
- Monochrome: preserve crown, anchor and star silhouette; laurel and waves may simplify.
- Small icon: retain crown + anchor/star as the minimum recognizable core.

Free Confederacy

- Core symbols: skull + red headscarf/bandana + crossed cutlasses + compass/star.
- Primary palette: crimson/red, black, bone/ivory, brass.

- Sails/flags: simplified 2D emblem with a strong skull-and-crossed-blades silhouette.
- Monochrome: preserve skull, crossed cutlasses and compass/star; cloth texture may simplify.
- Small icon: retain skull + crossed cutlasses as the minimum recognizable core.

Do Not

- Do not replace the Crown mark with a generic crown, anchor, lion or shield.
- Do not replace the Confederacy mark with a generic skull-and-crossbones.
- Do not create alternate faction sigils without explicit approval.
- Do not reproduce the high-resolution sculpted appearance on tiny sails.
- Do not add text, faction names or card UI to the emblem itself.
